Introducing **SUSTANA™**

SUSTANA™ improves the carbon impact of your supply chain, giving you and your customers products that will help achieve sustainability goals.

Low CO₂ Footprint

Unmatched customer service
and technical field support

Global resources that support
customer needs

SUSTANA™ - low-carbon, low energy products

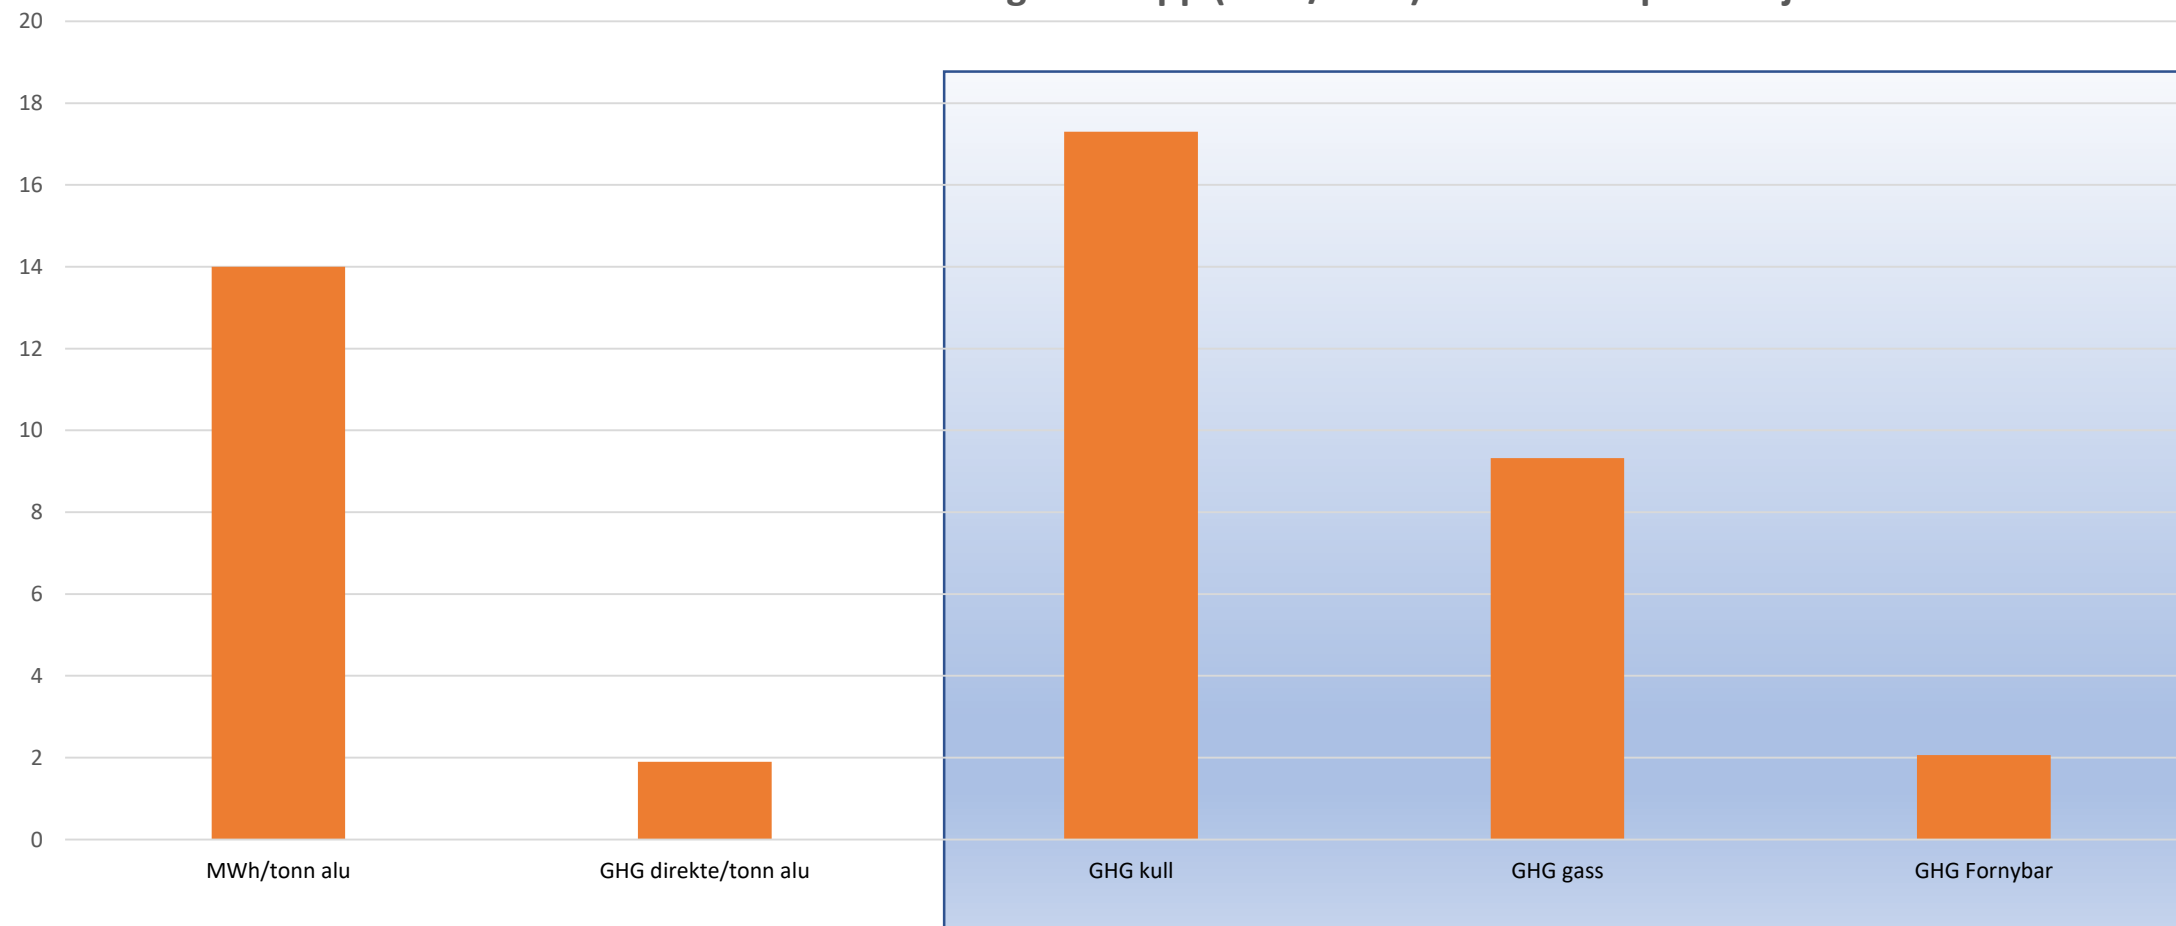

- Produced at Alcoa hydro-powered smelters that generate no more than 2.5 mt of CO2e per mt of aluminum
- Full suite of cast products
- Certificates of origin issued
- Possible contribution to LEED® certification

- Billet produced with up to 95% lower energy with remelting
- Minimum 50% recycled content
- Contribution to LEED® and BREEAM® certification

Klimagassutslipp (tonn/tonn) aluminiumsproduksjon med ulike kraftkilder

More productive

Lower Cost

Greener

Carbon Anode

- + Proprietary anode/cathode materials
- + Eliminates direct greenhouse gases
- + 30x increase in anode life
- + Reduces operating costs by 15%
- + Increases production by 15%
