# Prosessindustrien i fremtiden

- Press på lønnsomhet
  - Krav om reduserte utslipp
  - Variasjoner i råvarer
  - Mer sensorer og data
  - Økt behov for avansert dataanalyse for å håndtere datamengdene
- 
- Norges største konkurransefortrinn er arbeiderne. Det vil det være i fremtiden også!

# Condition Monitoring (End-to-end)

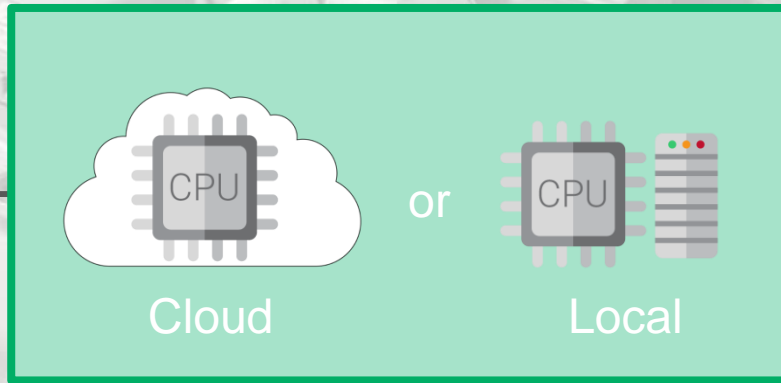

Thermal Camera

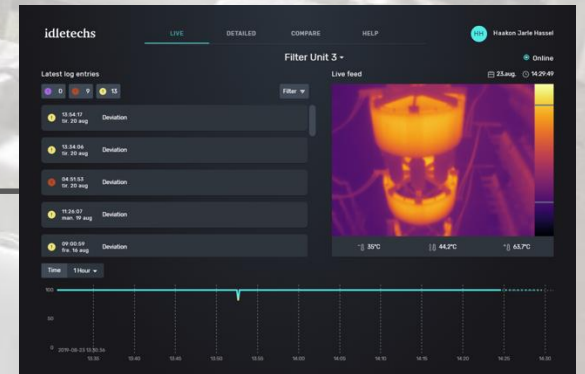

Hyperspectral Camera

Other sensors

- Early warning of abnormal behavior
- Continuous analysis of complex data streams
- Never stop looking for new behavior
- Users can add their expertise through annotating

# Stordata kybernetikk - dag i morgen i Trondheim:

ALL COURSES AND EVENTS

## Big Data Cybernetics

The meeting will be streamed

NOV. 27

16:30-19:00

SCANDIC NIDELVEN, TRONDHEIM

How do you utilize domain knowledge in combination with a data-driven approach?
